PLAN SUMMARY STATEMENT

This plan summary reflects the content of the toxic substance reduction plan for Safety-Kleen Canada Inc. (Safety-Kleen) for Polycyclic Organic Hydrocarbons (PAHs), prepared by Conestoga-Rovers & Associates.

STATEMENT OF INTENT

Safety-Kleen Manufacturing (Safety-Kleen) is committed to playing a leadership role in protecting the environment. Whenever feasible, we will reduce the use of all PAHs in compliance with all Federal and Provincial Regulations.

REDUCTION OBJECTIVES

Safety-Kleen prides itself on technological innovation in order to produce high quality lubricating oil products in an environmentally responsible manner. Through this plan, Safety-Kleen will determine the technical and economic feasibility of each option to determine which, if any, are viable for implementation at this time.

REDUCTION OPTIONS TO BE IMPLEMENTED

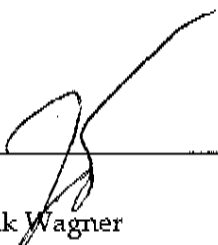

Safety-Kleen has not identified any feasible options which could be implemented. The current re-refining process is shown to already destroy 65.6% of the PAHs entering the

facility as a component of the used oil to be re-refined. In addition, no new PAHs are created in the process.

CERTIFICATION BY HIGHEST RANKING EMPLOYEE

As of December 21, 2012, I, Frank Wagner, certify that I have read the toxic substance reduction plan for the toxic substance referred to below and am familiar with its contents, and to my knowledge the plan is factually accurate and complies with the *Toxics Reduction Act, 2009* and Ontario Regulation 455/09 (General) made under that Act.
