

# MODEL 16/30

**TIME TESTED.** Our legacy sink-on-drum part washers have been around for more than fifty years, featuring a sink for washing parts on top of a 16- or 30-gallon drum of solvent. Machines feature a lid with fusible link, plastic spigot for solvent delivery, brush for cleaning parts and a lamp. Soiled parts are manually washed in the sink with solvent draining into the reservoir below.
